EMBRIA HEALTH SCIENCES EXPANDS OPERATIONS DEPARTMENT

ANKENY, Iowa, August 24, 2009 — Embria[®] Health Sciences, raw material supplier of science-backed natural ingredients, today announced the expansion of its operations department with the hire of Spencer Blair and Bobby Rowden for the new positions of operators.

As operators, Blair and Rowden will be responsible for the running, maintenance and testing of manufacturing equipment in accordance with GMP and corporate standards. They will report to Embria's director of operations, Mark Joyner. Both Blair and Rowden have substantial experience within the manufacturing and technology sectors.

"We are pleased to expand the operations department here at Embria," remarked Joyner, "The technical know-how of Spencer and Bobby will ensure the continuing quality of our ingredients."

About Embria Health Sciences:

Embria Health Sciences, www.embriahealth.com, combines science and nature to bring high-quality, research-based natural ingredients to the global human nutrition market. Embria's flagship ingredient, EpiCor[®], is an all-natural product designed to modulate and balance the human immune system and is manufactured using a proprietary technology, which produces vital metabolites, vitamins, minerals, and antioxidants that deliver nutritional benefits and support increased bioavailability. Recent human clinical studies show EpiCor significantly decreases the incidence of some common symptoms associated with seasonal allergies, and decreases the incidence and duration of cold and flu symptoms. EpiCor has also been shown to possess anti-inflammatory activity, and activates crucial defense cells (Natural Killer, T-, and B-cells). For more information on immune health, visit www.BalancedImmuneHealth.com.
